

Troop 221 Outing Information (11/06)

Troop 221 is a large Troop with a challenging program of outings and activities. This is possible because of parents and other adults who support the Troop's program. To carry out this program for your Scout and all the other boys, we need the cooperation and participation from all parents. Please read over the information below and complete the attached forms. If you have any questions, please contact one of the Troop leaders listed below.

- Rather than have parents complete a permission form for each outing, please complete the Family Contact Info/Permission Form and we will use it for the entire year. Please complete the driving information, including the \$\$ limits for your auto insurance. This is required by the BSA in order for the Troop outings to be covered by the Council's secondary accident and medical insurance policies.
- Complete the Class 1 Medical Form. This is a health history form and does not require a visit or signature from your son's physician.
- Information on upcoming outings and activities is announced at the beginning and end of each meeting. A detailed calendar is available on the Troop website www.troop221bsa.org. Please note that dates/locations may be subject to change, so check the website for the most current info.

We look forward to working with you to provide a challenging program for all Scouts in the Troop.
